

RITIK YADAV

Mumbai • 8291563516 • ritikyadav6397@gmail.com • [Portfolio](#)

Full-stack Software Developer with 1+ year of experience building scalable Node.js/Express backend services, secure REST APIs, and React/Angular frontends for healthcare fintech platforms. Experienced with JWT/RBAC authentication, real-time features (Socket.io), Redis caching, and Agile, Git-based delivery.

EDUCATION

University of Mumbai

Bachelor of Engineering in Information Technology

2020 – 2024

CGPA: 9.06 / 10

WORK EXPERIENCE

GMoney Pvt. Ltd. Associate Software Developer (MEAN)

Aug 2024 – Present

- Built a full-stack insurance Claim-Desk platform (Angular, Node.js, Express, MongoDB) enabling hospitals and doctors to upload policies, decode coverage, and run claim validation and approval workflows end-to-end.
- Secured RESTful APIs with JWT-based authentication and role-based access control (RBAC), and documented endpoints with Swagger/OpenAPI for cross-team integration.
- Automated policy decoding and eligibility checks, cutting manual claim-verification time by ~40% and reducing claim-processing errors by ~25%.
- Introduced Redis caching on high-traffic claim-status endpoints, reducing average API response time by ~35%.
- Built real-time claim-tracking dashboards using Socket.io and a Daily Tracker platform for RM activity, hospital onboarding, and GMoney card approvals — live for 50+ hospital partners.
- Built an internal IT Task Allocation & Tracking System with automated reminders and escalation workflows, cutting average IT ticket response time by ~30%.
- Built a Claim Tracker integrating third-party insurance webhooks for automated status sync, with secure document versioning and completeness checks, shortening claim turnaround time by ~30%.
- Debugged and resolved production defects using application logs and monitoring tools, drove root-cause analysis (RCA) on recurring issues, and followed Git-based workflows with code reviews in Agile sprints.

AARV Logistics

Jan 2023 – Mar 2023

- Designed and built a responsive company website for Aarav Logistics, including service pages, contact forms, and a UI focused on lead generation.
- Optimized the site for mobile devices, improving accessibility and engagement for prospective clients.

PROJECTS

Agency Kinetics [\[Link\]](#)

- Built a full-stack Agency Management System (React, Node.js, Express.js, MongoDB) with CRUD modules for clients, tasks, teams, and invoices.
- Implemented JWT-based authentication and role-based access control (RBAC), and automated workflows for lead tracking, task management, invoicing, and payments.
- Tested and documented REST APIs with Postman and Swagger/OpenAPI, and optimized MongoDB schema design and indexing to improve query performance by ~30%.

AGI App (Atharva Group of Institutions Application) [\[Link\]](#)

- Developed a Flutter mobile app that lets students view results, notices, timetables, and faculty details in a read-only format.
- Built a React admin dashboard connected to Firebase for managing academic content, pushing real-time updates, and controlling user access and permissions.

SKILLS & ADDITIONAL INFORMATION

Languages: JavaScript (ES6+), TypeScript, Node.js, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Angular, Node.js, Express.js, NestJS, Redux, Flutter, Bootstrap, Tailwind CSS, Material UI, Semantic UI, jQuery, Storybook

APIs & Real-Time: REST APIs, Webhooks, Socket.io / WebSockets, Swagger / OpenAPI, Postman, Supertest

Security: JWT, OAuth, RBAC, input validation & sanitization

Databases: MongoDB, MySQL, PostgreSQL, Firebase, Redis (schema design, indexing, query optimization, caching)

Tools: Docker, Git, GitHub, AWS, Postman, Thunder Client, VS Code, Figma, Arduino

Leadership: Chairperson, CSI ACE — led a 30+ member student technical community and organized 10+ workshops/events.

Web Lead, GDSC ACE — managed the chapter website and event/registration pages for 500+ student members.
